Subject Index of Volume 77

Acetic acid
aromatic *O*-demethylation with [Fe^0/acetic acid/O_2] system, L7
Adamantane
ascorbate-dependent mono- *vs.* dioxygenase mechanism for Ru(III)–EDTA catalysed oxidation of, by molecular oxygen, 221
Addition
of tetrachloromethane to halogenated ethenes catalysed by transition metal complexes, 51
Adsorption
sulphur: modification of Rh/Al_2O_3 catalysts by Cu deposition and, 87
Alcohol
Ni-atom-derived catalysts in linear dimerization *vs.* cyclodimerization of 1,3-dienes: evidence for nickel hydride complex using ethanol as reagent, 1
Aldaric acids
Pt-catalysed oxidation of aldopentoses to, 75
Aldopentoses
Pt-catalysed oxidation of, to aldaric acids, 75
Alkanes
addition of tetrachloromethane to halogenated ethenes catalysed by transition metal complexes, 51
formic acid–palladium acetate–1,4-bis-(diphenylphosphino)butane: effective catalytic system for regioselective hydrocarboxylation of simple and functionalized olefins, 7
hydrogenative ring-opening reactions of alkyl-substituted cyclopropanes over Pt/SiO_2 catalyst, 313
interaction between components of $LiCl–Co_3O_4$ catalyst for oxidative coupling of methane, 343
microgeometry of Pt/mordenite and stereoselectivity of methylcyclopentane ring-opening catalysis, 99
Ru-catalysed oxygenation of saturated hydrocarbons by t-butylhydroperoxide, 283
Alkenes, Olefins
addition of tetrachloromethane to halogenated ethenes catalysed by transition metal complexes, 51
catalytic alkene epoxidation with Ru complexes and hydrogen peroxide, 229
effect of solvent on kinetics of hydroformylation of 1-hexene using $HRh(CO)(PPh_3)_3$ catalyst, L13
epoxidation of cyclohexene with iodosylbenzene catalysed by Ru(III)–dmg and Ru(III)–dpg complexes: synthesis and characterization of catalytically active Ru(V)–oxo intermediates, 153
hydroformylation of, catalysed by $[Rh(SR)(CO)PR'_3]_2$: evidence for mononuclear active species, 159
hydroformylation of propene over palladium trimethylphosphinecarbonyl clusters encaged in zeolite Y, 181
IR spectroscopic investigation of gas–solid heterogeneous photocatalytic oxidation of trichloroethylene, 297
isomerization of quadricyclane to norbornadiene catalysed by (η^5-cyclopentadienyl) (substituted 1,2-benzenedithiolato)cobalt(III) complexes, L1
microstructure of ring-opened polymers and copolymers of norbornadiene, 61
Ni-atom-derived catalysts in linear dimerization *vs.* cyclodimerization of 1,3-dienes: evidence for nickel hydride complex using ethanol as reagent, 1
prediction of reactivities of Ti–methyl bonds in O_h–d^0 methyltitanium chlorides for insertion of ethylene: analysis by 'paired interacting orbitals' (PIO), 135
quantification of influence of steric and electronic parameters on ethylene

polymerization activity of $(CpR)_2$-$ZrCl_2$/ethylaluminoxane Ziegler–Natta catalysts, 41
reactivity of SiO_2 aerogel activated by hydrogen spillover for hydrogenation of ethylene and cracking of cumene, 201
ring-opening metathesis polymerization of dicyclopentadiene by unicomponent catalysts derived from WCl_6, 289
simple and functionalized: effective catalytic system for regioselective hydrocarboxylation of: formic acid–palladium acetate–1,4-bis-(diphenylphosphino)butane, 7
Alkylation
reductive N-, of nitroarenes using methyl formate as simultaneous hydrogenating and methylating agent, 247
Aluminium
modification of Rh/Al_2O_3 catalysts by Cu deposition and sulphur adsorption, 87
quantification of influence of steric and electronic parameters on ethylene polymerization activity of $(CpR)_2$-$ZrCl_2$/ethylaluminoxane Ziegler–Natta catalysts, 41
Raman spectroscopy of V_2O_5, MoO_3, Fe_2O_3, MoO_3–V_2O_5 and Fe_2O_3–V_2O_5 supported on alumina catalysts: influence of coverage and dehydration, 29
surface organometallic chemistry on oxides: reaction of hydrogen with bis(allyl)rhodium grafted to silica, titania and alumina, 257
Amines
application of palladium ferrocenyl amine sulphide complexes in hydrogenation of C–C double and triple bonds, 125
direct synthesis of asymmetric amines R_2NR' in presence of multifunctional Cu-based catalysts, 321
role of resin–transition metal complexes containing hydroxy amine ligand in hydrogen peroxide decomposition, 15
Aromatic compounds
aromatic *O*-demethylation with [Fe^0/acetic acid/O_2 system, L7
effect of solvent on kinetics of hydroformylation of 1-hexene using $HRh(CO)(PPh_3)_3$ catalyst, L13
epoxidation of cyclohexene with iodosylbenzene catalysed by Ru(III)–dmg and Ru(III)–dpg complexes: synthesis and characterization of catalytically active Ru(V)–oxo intermediates, 153
formic acid–palladium acetate–1,4-bis-(diphenylphosphino)butane: effective catalytic system for regioselective hydrocarboxylation of simple and functionalized olefins, 7
hydrogenation of nitrobenzene using polymer-supported Ru(III) complexes as catalysts, 235
isomerization of quadricyclane to norbornadiene catalysed by (η^5-cyclopentadienyl)(substituted 1,2-benzenedithiolato)cobalt(III) complexes, L1
kinetics and mechanism of epoxidation of styrene and substituted styrenes with O_2 catalysed by $[Ru^{III}(EDTA)(H_2O)]^-$, 23
reactivity of SiO_2 aerogel activated by hydrogen spillover for hydrogenation of ethylene and cracking of cumene, 201
reductive N-alkylation of nitroarenes using methyl formate as simultaneous hydrogenating and methylating agent, 247
Ascorbate
-dependent mono- *vs.* dioxygenase mechanism for Ru(III)–EDTA catalysed oxidation of adamantane by molecular oxygen, 221

t-Butylhydroperoxide
Ru-catalysed oxygenation of saturated hydrocarbons, by, 283

Cabbage peroxidase
soluble and immobilized, after treatment with seven different proteases; changes in activity of, 365
C–C double and triple bonds
application of palladium ferrocenyl amine sulphide complexes in hydrogenation of, 125
Charge sensitivity analysis
of oxide catalysts: V_2O_5 clusters and $(n\text{-}V_2O_5)$- - -H_2 systems, 165

Chlamydomonas reinhardtii
kinetic and catalytic characterization of urate oxidase from 353
Chlorine/fluorine exchange
heterogeneous: kinetics of, on model system CCl_4/HF over CrF_3 catalyst, 193
Chromium
kinetics of heterogeneous chlorine/fluorine exchange on model system CCl_4/HF over CrF_3 catalyst, 193
Clusters
charge sensitivity analysis of oxide catalysts: V_2O_5 clusters and $(n\text{-}V_2O_5)\text{---}H_2$ systems, 165
hydroformylation of propene over palladium trimethylphosphinecarbonyl clusters encaged in zeolite Y, 181
Cobalt
catalytic effects of lanthanide in lanthanide–Co bimetallic catalyst systems, 333
interaction between components of LiCl–Co_3O_4 catalyst for oxidative coupling of methane, 343
isomerization of quadricyclane to norbornadiene catalysed by (η^5-cyclopentadienyl)(substituted 1,2-benzenedithiolato)cobalt(III) complexes, L1
Copolymer(s)
improving cooperation of co-catalysts by locating them on different units of, 273
ring-opened polymers and, of norbornadiene; microstructure of, 61
Copper
-based catalysts, multifunctional; direct synthesis of asymmetric amines R_2NR' in presence of, 321
deposition: modification of Rh/Al_2O_3 catalysts by, and sulphur adsorption, 87
Cracking
reactivity of SiO_2 aerogel activated by hydrogen spillover for hydrogenation of ethylene and, of cumene, 201

Decomposition
hydrogen peroxide: role of resin–transition metal complexes containing hydroxy amine ligand in, 15
Dehydration
and coverage: influence of; Raman spectroscopy of V_2O_5, MoO_3, Fe_2O_3, MoO_3–V_2O_5 and Fe_2O_3–V_2O_5 supported on alumina catalysts, 29
Demethylation
aromatic *O*-, with [Fe^0/acetic acid/O_2] system, L7
Dimerization
linear: Ni-atom-derived catalysts in, *vs.* cyclodimerization of 1,3-dienes; evidence for nickel hydride complex using ethanol as reagent, 1

Epoxidation
catalytic alkene, with Ru complexes and hydrogen peroxide, 229
of cyclohexene with iodosylbenzene catalysed by Ru(III)–dmg and Ru(III)–dpg complexes: synthesis and characterization of catalytically active Ru(V)–oxo intermediates, 153
kinetics and mechanism of, of styrene and substituted styrenes with O_2 catalysed by $[Ru^{III}(EDTA)(H_2O)]^-$, 23
Esters
formic acid–palladium acetate–1,4-bis-(diphenylphosphino)butane: effective catalytic system for regioselective hydrocarboxylation of simple and functionalized olefins, 7
reductive N-alkylation of nitroarenes using methyl formate as simultaneous hydrogenating and methylating agent, 247

Film
polycrystalline SAPO-5; synthesis and characterization of, L19
Formic acid
–palladium acetate–1,4-bis(diphenylphosphino)butane: effective catalytic system for regioselective hydrocarboxylation of simple and functionalized olefins, 7

Halogens
addition of tetrachloromethane to halogenated ethenes catalysed by transition metal complexes, 51
Hydrocarboxylation
regioselective: effective catalytic system for, of simple and functionalized olefins; formic acid–palladium

acetate–1,4-bis(diphenylphosphino)-butane, 7
Hydroformylation
of alkenes catalysed by [Rh(SR)(CO)-$PR'_3]_2$: evidence for mononuclear active species, 159
effect of solvent on kinetics of, of 1-hexene using $HRh(CO)(PPh_3)_3$ catalyst, L13
of propene over palladium trimethylphosphinecarbonyl clusters encaged in zeolite Y, 181
Hydrogenation
application of palladium ferrocenyl amine sulphide complexes in, of C–C double and triple bonds, 125
hydrogenative ring-opening reactions of alkyl-substituted cyclopropanes over Pt/SiO_2 catalyst, 313
of nitrobenzene using polymer-supported Ru(III) complexes as catalysts, 235
reactivity of SiO_2 aerogel activated by hydrogen spillover for, of ethylene and cracking of cumene, 201

Immobilization
changes in activity of soluble and immobilized cabbage peroxidase after treatment with seven different proteases, 365
Iron
application of palladium ferrocenyl amine sulphide complexes in hydrogenation of C–C double and triple bonds, 125
aromatic *O*-demethylation with [Fe^0/acetic acid/O_2] system, L7
Raman spectroscopy of V_2O_5, MoO_3, Fe_2O_3, MoO_3–V_2O_5 and Fe_2O_3–V_2O_5 supported on alumina catalysts: influence of coverage and dehydration, 29
Isomerization
of quadricyclane to norbornadiene catalysed by (η^5-cyclopentadienyl)-(substituted 1,2-benzenedithiolato)-cobalt(III) complexes, L1

Lanthanide
catalytic effects of, in lanthanide–Co bimetallic catalyst systems, 333
Lithium
interaction between components of $LiCl$–Co_3O_4 catalyst for oxidative coupling of methane, 343

Metathesis
ring-opening, polymerization of dicyclopentadiene by unicomponent catalysts derived from WCl_6, 289
Methyltitanium chlorides
O_h–d^0: prediction of reactivities of Ti–methyl bonds in, for insertion of ethylene; analysis by 'paired interacting orbitals' (PIO), 135
Microgeometry
of Pt/mordenite and stereoselectivity of methylcyclopentane ring-opening catalysis, 99
Microstructure
of ring-opened polymers and copolymers of norbornadiene, 61
Molybdenum
Raman spectroscopy of V_2O_5, MoO_3, Fe_2O_3, MoO_3–V_2O_5 and Fe_2O_3–V_2O_5 supported on alumina catalysts: influence of coverage and dehydration, 29
Mordenite
microgeometry of Pt/mordenite and stereoselectivity of methylcyclopentane ring-opening catalysis, 99

Nickel
-atom-derived catalysts in linear dimerization *vs.* cyclodimerization of 1,3-dienes: evidence for nickel hydride complex using ethanol as reagent, 1

Olefins: see Alkanes
Oxidation
gas–solid heterogeneous photocatalytic; IR spectroscopic investigation of, of trichloroethylene, 297
Pt-catalysed, of aldopentoses to aldaric acids, 75
Ru(III)–EDTA catalysed; ascorbate-dependent mono- *vs.* dioxygenase mechanism for, of adamantane by molecular oxygen, 221
Oxidative coupling
interaction between components of $LiCl$–Co_3O_4 catalyst for, of methane, 343

Oxygen
aromatic *O*-demethylation with [Fe^0/acetic acid/O_2] system, L7
ascorbate-dependent mono- *vs.* dioxygenase mechanism for Ru(III)–EDTA catalysed oxidation of adamantane by molecular oxygen, 221
kinetics and mechanism of epoxidation of styrene and substituted styrenes with O_2 catalysed by [Ru^{III}(EDTA)-(H_2O)]$^-$, 23
prediction of reactivities of Ti–methyl bonds in O_h–d^0 methyltitanium chlorides for insertion of ethylene: analysis by 'paired interacting orbitals' (PIO), 135
Oxygenase
ascorbate-dependent mono- *vs.* dioxygenase mechanism for Ru(III)–EDTA catalysed oxidation of adamantane by molecular oxygen, 221
Oxygenation
Ru-catalysed, of saturated hydrocarbons by t-butylhydroperoxide, 283

'Paired interacting orbitals' (PIO)
analysis by: prediction of reactivities of Ti–methyl bonds in O_h–d^0 methyltitanium chlorides for insertion of ethylene, 135
Palladium
application of palladium ferrocenyl amine sulphide complexes in hydrogenation of C–C double and triple bonds, 125
formic acid–palladium acetate–1,4-bis-(diphenylphosphino)butane: effective catalytic system for regioselective hydrocarboxylation of simple and functionalized olefins, 7
hydroformylation of propene over palladium trimethylphosphinecarbonyl clusters encaged in zeolite Y, 181
vinyl substituent effects on reactions of higher oxygenates on Pd(111), 109
Platinum
-catalysed oxidation of aldopentoses to aldaric acids, 75
hydrogenative ring-opening reactions of alkyl-substituted cyclopropanes over Pt/SiO_2 catalyst, 313
microgeometry of Pt/mordenite and stereoselectivity of methylcyclopentane ring-opening catalysis, 99
Polycrystalline SAPO-5 film
synthesis and characterization of, L19
Polymerization
ethylene, activity; quantification of influence of steric and electronic parameters on, of $(CpR)_2ZrCl_2$/ethylaluminoxane Ziegler–Natta catalysts, 41
ring-opening metathesis, of dicyclopentadiene by unicomponent catalysts derived from WCl_6, 289
Polymers
hydrogenation of nitrobenzene using polymer-supported Ru(III) complexes as catalysts, 235
ring-opened, and copolymers; microstructure of, of norbornadiene, 61
Proteases
seven different; changes in activity of soluble and immobilized cabbage peroxidase after treatment with, 365

Quadricyclane
isomerization of, to norbornadiene catalysed by (η^5-cyclopentadienyl)-(substituted 1,2-benzenedithiolato)cobalt(III) complexes, L1

Resin
–transition metal complexes containing hydroxy amine ligand in hydrogen peroxide decomposition; role of, 15
Rhodium
effect of solvent on kinetics of hydroformylation of 1-hexene using HRh-(CO)(PPh_3)$_3$ catalyst, L13
hydroformylation of alkenes catalysed by [Rh(SR)(CO)PR'_3]$_2$: evidence for mononuclear active species, 159
modification of Rh/Al_2O_3 catalysts by Cu deposition and sulphur adsorption, 87
surface organometallic chemistry on oxides: reaction of hydrogen with bis(allyl)rhodium grafted to silica, titania and alumina, 257
Ruthenium
ascorbate-dependent mono- *vs.* dioxygenase mechanism for Ru(III)–EDTA catalysed oxidation of adamantane by molecular oxygen, 221
-catalysed oxygenation of saturated hydrocarbons by t-butylhydroperoxide, 283

catalytic alkene epoxidation with Ru complexes and hydrogen peroxide, 229
epoxidation of cyclohexene with iodosylbenzene catalysed by Ru(III)–dmg and Ru(III)–dpg complexes: synthesis and characterization of catalytically active Ru(V)–oxo intermediates, 153
hydrogenation of nitrobenzene using polymer-supported Ru(III) complexes as catalysts, 235
kinetics and mechanism of epoxidation of styrene and substituted styrenes with O_2 catalysed by $[Ru^{III}(EDTA)(H_2O)]^-$, 23

Silicon
hydrogenative ring-opening reactions of alkyl-substituted cyclopropanes over Pt/SiO_2 catalyst, 313
reactivity of SiO_2 aerogel activated by hydrogen spillover for hydrogenation of ethylene and cracking of cumene, 201
surface organometallic chemistry on oxides: reaction of hydrogen with bis(allyl)rhodium grafted to silica, titania and alumina, 257
Spectroscopy
IR spectroscopic investigation of gas–solid heterogeneous photocatalytic oxidation of trichloroethylene, 297
Raman, of V_2O_5, MoO_3, Fe_2O_3, MoO_3–V_2O_5 and Fe_2O_3–V_2O_5 supported on alumina catalysts: influence of coverage and dehydration, 29
Sulphur adsorption
modification of Rh/Al_2O_3 catalysts by Cu deposition and, 87
Surface organometallic chemistry
on oxides: reaction of hydrogen with bis(allyl)rhodium grafted to silica, titania and alumina, 257

Titanium
prediction of reactivities of Ti–methyl bonds in O_h–d^0 methyltitanium chlorides for insertion of ethylene: analysis by 'paired interacting orbitals' (PIO), 135
surface organometallic chemistry on oxides: reaction of hydrogen with bis(allyl)rhodium grafted to silica, titania and alumina, 257
Transition metal complexes
addition of tetrachloromethane to halogenated ethenes catalysed by, 51
–resin containing hydroxy amine ligand in hydrogen peroxide decomposition: role of, 15
Trichloroethylene
IR spectroscopic investigation of gas–solid heterogeneous photocatalytic oxidation of, 297
Tungsten
ring-opening metathesis polymerization of dicyclopentadiene by unicomponent catalysts derived from WCl_6, 289

Urate oxidase
kinetic and catalytic characterization of, from *Chlamydomonas reinhardtii*, 353

Vanadium
charge sensitivity analysis of oxide catalysts: V_2O_5 clusters and $(n\text{-}V_2O_5)\text{---}H_2$ systems, 165
Raman spectroscopy of V_2O_5, MoO_3, Fe_2O_3, MoO_3–V_2O_5 and Fe_2O_3–V_2O_5 supported on alumina catalysts: influence of coverage and dehydration, 29
Vinyl substituent effects
on reactions of higher oxygenates on Pd(111), 109

Zeolite
Y: hydroformylation of propene over palladium trimethylphosphine-carbonyl clusters encaged in, 181
Ziegler–Natta catalysts
$(CpR)_2ZrCl_2$/ethylaluminoxane; quantification of influence of steric and electronic parameters on ethylene polymerization activity of, 41
Zirconium
quantification of influence of steric and electronic parameters on ethylene polymerization activity of $(CpR)_2ZrCl_2$/ethylaluminoxane Ziegler–Natta catalysts, 41
